

Hepatitis A

- is an inflammation of the liver caused by the hepatitis A virus.
- is transmitted through fecal-oral contamination (unsafe water or food), inadequate sanitation, poor personal hygiene and oral-anal sex.

Symptoms

fever

fatigue

loss of appetite

abdominal
pain

jaundice

nausea
& vomiting

Preventions

cooking
food well

washing hands
before & after
eating

drinking clean
& safe water

avoiding
raw meals

using detergents
in cleaning
bathrooms

proper disposal
of sewage water

In Pregnancy

- There is a high risk of preterm labor especially when caught during the second or third trimester
- It might also cause uterine contractions and placental abruption

Complications

Unlike other types of viral hepatitis , hepatitis A does not cause long-term liver damage.
