RAIN
evidence of organic disease

Stroke-Investigations
diagnose the stroke: (Conventional T1, T2-
value in the first 2-5days,
T2WI after 5 days. It will permit to delineate the lesion and differentiate
from the watershed or non-ischemic lesions
MRI will also enable the prognostication especially
infarct, location
(size of
Magnetic re
giography (MRA) and
(MRV) also
ormed, especially
venography
suspected
