

ICRC

- In many parts of the world archaeologists work in post-conflict countries.
- They help to find and identify the victims of violence.
- It is vitally important for the families to know what happened to their loved ones and this can also be a crucial step in healing.
- The International Committee of the Red Cross (ICRC) has been working in conflict zones for over 160 years.

Sciatic Notch

The male sciatic notch tends to be narrow and 'U-shaped' and the female sciatic notch is wider and 'V-shaped'.
In some individuals, the sciatic notch may seem intermediate and although to assign as male or female.
In such cases, it is useful to refer to the 'Koppecke arc'.

Blue is on the left (medial), red is on the right (lateral).
and orange on the right is yellow.
