MIDWIVES ARE ESSENTIAL IN EVERY EMERGENCY

- "Midwives play a vital role in every emergency and should be part of all core medical activities."
- "This emergency response shows how essential our role is as midwives—upholding women's health and rights, and making sure sexual and reproductive healthcare continues, even in the hardest times."
- "There will always be pregnant women, even in war: Midwives ensure these women receive lifesaving and respectful care."
- "Family Planning (FP), though often underestimated, is critical, unplanned pregnancies during war make situations more dangerous."
- "Midwifery-led models must be prioritized in humanitarian responses."
