تدكيم مشروع

الث

This project is centered around a green courtyard that fosters the social and spatial core, fostering community interaction and cultural expression. Fragmented building masses define the courtyard's edges, creating a fluid relationship between indoor and outdoor spaces. The design draws inspiration from traditional village layouts and Mediterranean courtyards, integrating nature as a key design element. A network of pathways, shaded areas, and greenery encourages movement, gathering, and reflection, while respecting the local climate and cultural identity.
